### Rewards

| Low   | Medium | High    | Critical |

| \$150 | \$500  | \$1,500 | \$3,000  |

Low vulnerabilities can receive up to \$250 bounty depending upon the impact of the vulnerability and the team's internal assessment of the report.

#### Eligibility for Reward (Bounty)

As much as we want to reward every qualifying vulnerability in reports that come in, we need to adhere to strict guidelines in order to make our program sustainable. If a report does not qualify for a bounty, it can still qualify for reputation points. Our eligibility requirements are stated below:

Monetary reward is awarded when all of the following conditions are met:

1. The report is a qualifying vulnerability (often just referred to as "valid")
2. There is a clear, verified Proof-of-Concept (PoC) of a possible abuse of this vulnerability on our system
3. You are the first reporter of the vulnerability
4. The reported vulnerability effects one of the domains in Scope
5. No action under 'Prohibited Actions' was performed in the report

The amount of reward is based on the following:

- The severity of the vulnerability (CVSS rating)
- The likelihood of exploit
- The quality of the report
